Food Safety Made Easy

Eliminate surprises and ensure compliance with continuous monitoring.

blueRover automatically senses and monitors the temperature of your equipment and food compared against its expected target range. If it deviates from that temperature, your team is instantly notified via SMS or email.

Food Safety Traceability

All food safety information within one centralized platform.

Designed to provide monitoring and analytics from all aspects of your food safety program, you can customize the platform to suit your needs..

| Cold Storage Monitoring | Mobile Monitoring | Food Temp Monitoring | Hot Hold Monitoring | Cool Down Monitoring |

Food Safety Dashboard

Centralized data reporting to distinguish trends and streamline operations.

The Portal allows you to remotely monitor your operations around the clock and across the world.

Customizable thresholds allow you to decide when you receive alerts for temperature deviations. With instant text and email alerts, never be caught unaware by the unexpected again.
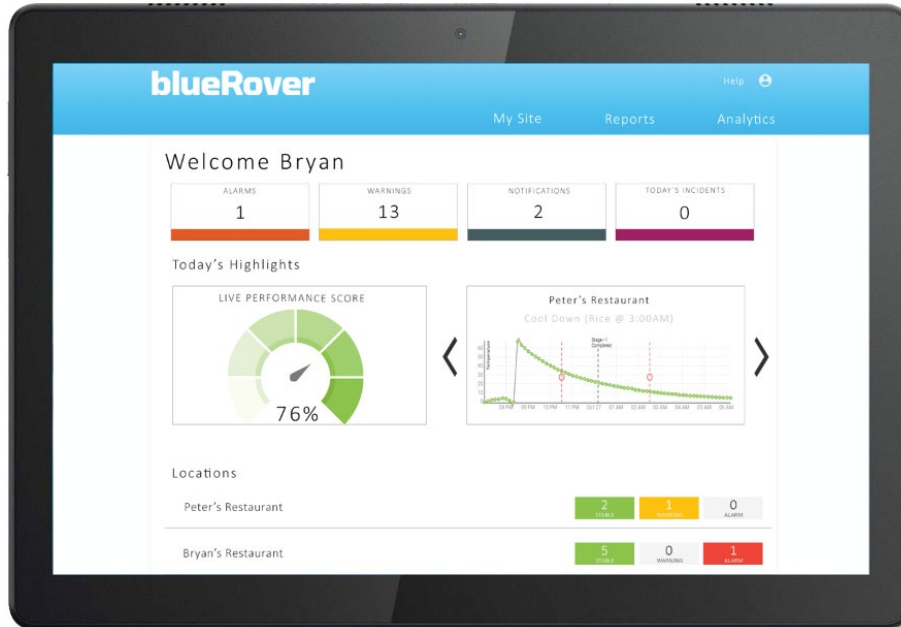

Online HACCP Logs

Performance Reports

Incidents Hub

Digital Checklists

Online HACCP Logs

blueRover

Access, review and approve all temperature logs online.

Performance Reports

Continuously improve food safety performance with real-time statistics.

Incidents Hub

Potential food safety threats are identified and tracked until resolved.

Corrective actions are stored with the incident report for continuous improvement.

Getting Started is Simple

Setup

The system is entirely pre-configured allowing you to begin monitoring in seconds. Our white-glove installation assistance gets you up and running quickly and easily.

Training

All staff members will be given a dedicated training session for a comprehensive understanding of the system. Our Food Safety Experts host a 30-day followup session to teach you continious improvement techniques.

blueRover

We'd love to hear from you!
